CMOS IMAGE SENSOR AND MANUFACTURING METHOD OF THE SAME For.

PRELIMINARY AMENDMENT

Commissioner for Patents Washington, D.C. 20231

Date: March 7, 2003

Sir:

Prior to continued examination on the merits, please amend the above-captioned patent application as follows:

IN THE CLAIMS:

Please amend claim 2 as follows:

2. (Twice Amended) A CMOS image sensor comprising a pixel consisting of:

a photodiode having an impurity region formed in semiconductor substrate;

a first MOS transistor formed on said semiconductor substrate, the first MOS transistor

having an impurity region as a drain connected to said impurity region of said photodiode;

a second MOS transistor formed on said semiconductor substrate, the second MOS transistor

having an impurity region as a source connected to a source of said first MOS transistor; and

a third MOS transistor formed on said semiconductor substrate, the third MOS transistor

having an impurity region as a source connected to a drain of said second MOS transistor,
